

Foreign Paupers.—Some facts have recently been submitted to the attention of the Boston public, well calculated to excite inquiry in relation to the arrival of foreign paupers in this country. We deeply regret the condition of the working classes of Great Britain—deplorable, and would, if in our power, mitigate the evils under which they labor; but whatever sympathy we may feel for the sufferers of foreign nations, "charity begins at home"—and we feel no disposition to reduce the mechanics and day-laborers of this country, to a level with the most degraded and impoverished of European classes. It is, therefore, that we are opposed to the importation of foreign paupers, and disapprove of the adoption of measures, on the part of the General and State Governments, calculated to prevent the ingress of the thousands of indigent beggars annually poured into our country, by the British Government. No class of people are more interested in this matter, than our mechanics and day-laborers; and no class should unite more firmly to resist the evil complained of. Let us endeavor to make this matter plain. We believe that it will be generally admitted, under existing circumstances, and the present condition of business and enterprise; we have enough, and more than enough mechanics and day-laborers, to carry on all the work in progress, or likely to be attempted for years to come. Suppose, therefore, that the city of Philadelphia can find employment for 5,000 mechanics and 1,000 day-laborers, and that we have just that number residing among us: the result will be that all will find employment at fair and liberal wages. But, suppose that in the course of a single year, we received from abroad a thousand additional laborers—English paupers, who have been in the habit of working for a miserable sum in England, and who, on arriving in this country, offer to work for half the sum usually allowed. What is the consequence? The American laborer is either cut down half his wages, or is compelled to go without work. This is the natural result, and it is in vain to deny it—for, however liberal men may be, they will not pay three dollars for an article that may be obtained for two. This rule will apply as well to mechanics as others, although it is proper to state that very few, comparatively speaking, of the paupers sent over here by the British government, deserve, or are entitled to the appellation of Mechanics.

The official statement is exactly in point: "It appears from an examination of the Register, of admissions to the House of Industry, of Alms-house, at South Boston, that there were received into that establishment, during the year ending September 30, 1829, Americans 396, Foreigners 281, and during the year ending Sept. 30, 1833, Americans paupers, in 5 years, 10 per cent; increase of Foreign, in the same time, 145 per cent."

This, says the Boston Atlas, from which we gather the statement, is the case, in a still greater degree, in New York, Philadelphia and Baltimore. Now, the American people can make choice between the two cases. They must either make up their minds to support their own laborers and mechanics, by affording them the means of earning an honest livelihood, or they must determine to starve them, and thus encourage this description of emigration, and by encouraging it, reduce their own mechanics and laborers to the condition of the working classes of Europe. It is quite time for our citizens to turn their attention to the subject. It is one that deeply concerns us all, and especially the classes we have named. We do not object to the introduction into this country of honest and industrious men, from any section of the globe; on the contrary, we cordially welcome them; but we do object to the introduction here of the refuse of society—the idle and lazy, unwilling to work, dead to every impulse of ambition, and content to waste on a miserable existence in our Alms-houses. The question is one that should not be blinked—it is one in which our naturalized fellow-citizens are deeply interested as any other class; indeed, we will find no portion of the honest and industrious classes of the community willing to be taxed, to support the indigent citizens of another country; and hence, the subject should excite the attention of all. The question is one of the simplest character. Are we willing to reduce American labor to the level of foreign labor? or, are we willing to sustain our own citizens to the exclusion of those who, in consequence of indolence and bad habits, are exported to this country? *Phil. Inq.*

CIRCULAR.

Proposed location of the Theological Seminary and Classical School of the German Reformed Church.

The undersigned, a committee appointed for the purpose, by the Synod of the German Reformed Church, now in session at Pittsburgh, represent:

That Synod has resolved to call a special General Synod, to meet at Harrisburg, on the first Monday in December next, for the purpose of determining upon the permanent location of their Theological Seminary and Classical School, and of transacting such other business as may then and there come before them. Both these institutions have, for some years past, been located at York, in this State, and are in prosperous circumstances. They are under the care of competent professors and teachers, and a considerable amount of funds has been contributed for their endowment.

The advantages of such institutions, both in a literary and moral point of view, are unquestionably great, and appear to be appreciated. Professors, inviting their removal from York, presenting strong inducements to the to do so, have already been

made from the inhabitants of more than one respectable town in this Commonwealth, but it has been thought best, before a selection is made, to give public notice of the determination of the Synod, permanently to locate these valuable establishments, in order that all who may desire to compete for them, may have an opportunity of presenting their claims.

The undersigned, therefore, give this public notice of the intended meeting of a General Synod of the German Reformed Church, at the time and place specified, for the express purpose of permanently locating their Theological Seminary and Classical School, and they accordingly invite proposals from the good people of all such places as may desire to have them established among them. Such offers must, as a matter of course, guarantee, in a formal and legally binding manner, whatever offers they may embrace.

The Committee are also authorized to invite, and do hereby invite, the attendance of all ministers belonging to the church, and of all elders who may be delegated by their respective congregations, to be present at the said General Synod of the German Reformed Church, at the time and place above specified.

Session of Synod.
Pittsburg, Sept. 15th, 1834.

Disgraceful.—We understand that a mob of 100 to 150 persons proceeded up Broadway last night, between 9 and 10 o'clock, to the marble factory of Mr. Bloomer, in Fourth street, which they entered without opposition, (the building being uninhabited,) and in a very few minutes destroyed marble fire-places and mantle pieces (some of them very splendid) to the amount of about \$2000. Fortunately the most valuable part of the marble work escaped damage, being in a room that was not discovered. The progress of the mob up Broadway excited little notice, as there was no noise, and it was supposed they were returning from a meeting. It appears that their object was to punish Mr. Bloomer for having in his possession articles that were manufactured in the Sing Sing State Prison.

N. Y. Jour. Com.

It is stated that in the town (or township) of Franklin, near Wrentham, Mass., containing a population of about 1,700 persons, the value of the straw hats manufactured by the females is between 75,000 and 80,000 dollars a year.

After the death of William IV. the Duke of Cumberland will be king of Hanover, and thus will the crowns of England and Hanover be separated. The Duke of Cumberland's only son is so feeble in health that it is believed he cannot live long. After him comes the Duke of Sussex, whose sons by Lady Augusta Murray, although debarred from the British throne, are entitled to succeed in Hanover.

Child killed by rats.—The Coroner of Philadelphia was called a few days since to view the dead body of a black child, which the mother deposed, she found dead in its bed—its face being nearly eaten off by the rats.

More work for the Supreme Court and Georgia Nullification.—We learn from the Milledgeville Times that at the term of Murray superior Court, a Cherokee Indian, by the name of John Graves, was indicted and convicted of the murder of a white man by the name of Bates. He was sentenced to be hung on the 21st of November next.

"A plea to the jurisdiction was filed in this case and overruled; application has since been made to the Supreme Court of the United States, for a writ of error in behalf of the prisoner. The citation which accompanies it, as a matter of course, will be here probably in ten or fifteen days, and served as the former one was, in the case of Tassels, upon the Governor, citing the state of Georgia to appear before the bar of the tribunal."

A breach mended by money.—A suit was tried a few days since at Somerset, N. J. wherein Mary Ann Bolos claimed damages from S. M. Allison, for refusing to marry her as per contract. The jury gave her twelve hundred dollars.

Niece of George Washington.—The story of the niece of Gen. Washington, lately applying to be admitted into a poor-house, in England, turns out, as might be expected, false. A writer in the Winchester Virginian, settles it. "Gen. Washington never had but one own niece—my aunt, the late Mrs. Charles Carter—who never was in England, certainly, and I believe never out of her native State, (Virginia,) and who died in my house four years since."

March of Serpents.—The rattlesnake trade between this country and Great Britain is represented as exceedingly flourishing. Consignments of that precious commodity are arriving daily in England, labelled "good merchantable rattlesnakes"—and there are already a hundred of them exhibiting in the Tower of London. We don't know what duties the British

but we hope, as the business increases in importance, the tariff will be adjusted judiciously, though we care not how soon the 'balance of trade' is found against us.

N. Y. Cour.

Cashmere Shirts.—It is computed that upwards of 50,000 persons are now engaged in Scotland, in manufacturing shawls, from the hair of the Cashmere and Thibet goat. The yarn for this purpose is principally obtained from France.

Flour in Baltimore \$5 12 1/2.

The new daily line of Stages between Columbia and Pittsburg, passing through this town, will commence running to-morrow. We wish every success to the enterprising proprietors.

It appears that Col. Johnston is not elected to our State Legislature, from Indiana and Jefferson counties, as stated in our last. He was beaten 16 votes by John Banks. The parties stand in the House, Banks 62—opposition 38.

The inauguration of the Rev. C. P. KRAUTH, as President of Pennsylvania College took place on Thursday last, agreeably to previous arrangement.

A procession was formed at the Court-house, at 11 o'clock, A. M. in the order given in our last paper, and proceeded to the German church. The Synod of Philadelphia, then in session in this place, adjourned and joined in the procession. The exercises were commenced with prayer by the Moderator of the Synod, Dr. CUYLER, of Philadelphia. The President of the College was then inducted to office, by the Rev. Professor SCHMUCKER, one of the Board of Trustees; after which a highly chaste and appropriate Inaugural Address was delivered by the President. The Benediction was then pronounced by the Rev. ASHUEL GREEN, D. D. of Philadelphia. During the exercises, a hymn was sung, and several pieces of music played by the Citizens' Band of this borough—which added considerable interest to the occasion.

The Synod of Philadelphia met in this place on Wednesday last; and was opened by a sermon from the Rev. WM. LATTA. Between 80 and 90 members are in attendance. The Rev. Dr. CUYLER, of Philadelphia, was chosen Moderator. The Synod is still in session.

OHIO SAFE!

In Ohio, it appears excited that the Whigs have carried a majority of the members of Congress, and of the State Legislature. The Congressional Representation stands thus:

Whigs. Bellamy Storor, Thomas Corwin, Jos. H. Crane, W. K. Bond, Elias Howell, Samuel Mason, Jonathan Sloane, David Spangler, Samuel F. Vinton, Elisha Whittlesey—10.

Jackson. John Chaney, T. L. Hamer, Benjamin Jones, William Kennon, Jeremiah M'Leane, Wm. Patterson, D. Kilgore, John Thomson, Taylor Webster—9.

Making a gain of two members since the last election.

In the State Legislature, last year, there was a Jackson majority of twenty-six; this year we have already a majority of eleven Whigs. On announcing this result, the Columbus Sentinel says, "Ohio—still Democratic Ohio—has gone over to the Whigs: The question has been had and settled without civil or doubt."—*Nat. Int.*

Fuller accounts from Ohio shew that the Whigs have a majority in both branches, and a joint majority of four teen—which gives them the command of the State. This is indeed joyful intelligence. It is yet a matter of doubt who is elected Governor; but the presumption is that Lucas is re-elected, as Mr. Findlay run behind the Whig Ticket almost in every district.

ILLEGAL VOTING.

John Jones was tried last week in one of the western counties of New York, on an indictment for a misdemeanor in knowingly bringing illegal voters to the polls, and persuading them to put in their ballots at the last fall election: he was convicted and sentenced to six months imprisonment.

Mr. Elliott, who was unsuccessful in his attempt to ascend with a balloon in Camden last summer, has made a very splendid ascension in Charleston, S. C. He left terra firma at 5 P. M. and returned to the city at 12 at night. He descended 12 miles outside of the Bar, and was picked up by the Pilot boat Cora, Captain Aides, after having been immersed in the water for upwards of thirty minutes.

Usuline Content.—It is stated in the Eastern papers, that Bishop Fenwick has determined on the erection of a new Convent at Newport, R. I. to supply the place of the one recently destroyed at Charlestown, Mass.

Extraordinary Heat.—In a table published in the Little Rock (Arkansas Territory) Advocate, of the heat experienced at Fort Gibson, it appears that on the 15th Aug. the thermometer, in the shade and at 2 o'clock, P. M. rose to 115 degrees. This is perhaps the greatest degree of heat on record. We have no doubt of its truth, having conversed formerly with a gentleman from that fortress, who represented the heat at that fortress almost unendurable.

The Poor House Barn of Bucks county, situated about three miles from Reading, was destroyed by fire on Saturday morning the 19th ult. Two of the inmates of the Poor House have been arrested on suspicion of being the incendiaries. Loss to the county estimated at \$6000.

The Medical Journal of last week relates a cure of deafness of some years standing, by removing from the external auditory passage of the right ear of a female of seventeen years of age, a cherry stone which was put in her ear by a playmate, ten years ago.

EXECUTORS AND ADMINISTRATORS.

The Berks and Schuylkill Journal says: "By an act of Assembly passed on the 24th of February last, and to take effect from the 1st of October inst., Executors and Administrators of every denomination, are required, immediately after the granting of letters testamentary or of administration, for them to advertise the same once a week, during at least six successive weeks, together with their names and places of residence, and in such advertisement they shall request all persons having claims or demands against the estate of the said deceased, to make known the same to them without delay."

They are Arming.—A New York paper states, on the authority of a respectable gunsmith, that more pistols and dirks have been sold in that city, within the last month, than have been disposed of during any six months, for the previous 10 years. We very much fear that the coming New York elections, will be marked by an awful sacrifice of human life.

Tragic event.—The greatest horror was lately excited in London, by the bloody act of a German, an optician, named Steinberg, who inhumanly murdered his whole family, consisting of a wife and four children, and then destroyed himself.

Old Wine.—A Bottle of Madeira was picked up recently from the wreck of the Royal George, sunk at Spithead in 1780, having been 54 years under water. It was in excellent condition, though covered with sea shells.

Comfort for Gin-Drinkers.—A medical gentleman in London met an old woman, who asked him whether he liked Gin, Rum, or Brandy best? He replied that he was not in the habit of taking either. "What?" said the astonished querist. "What, not take Gin? I like gin best of any thing; for I have been in the hospitals, and I know all about it. Gin only eats off the skin of the liver; rum fills it full like a sponge; but brandy eats holes into it that I could put my finger in."

Progress of Temperance.—It is a subject of congratulation that the Temperance cause is making such progress both on the land and the ocean. More than a thousand vessels are now afloat in which ardent spirit is not used. And though they visit every climate, and at all seasons, and many of them actually go round the globe, the men who navigate them are in all respects better than when they used it. So manifest and great has been the increase of safety to property and life, that the Insurance Companies in New York, have unanimously agreed to return five per cent, on the premium of every vessel which has been navigated without the use of ardent spirits.

BEER vs WINE.—The Italian papers begin to complain that the consumption of beer is daily increasing in the Wine countries. At Padua there are three breweries fully employed; not only men but women are fond of this beverage which is dearer than wine.

We observe that an inhabitant of the city of New York, who had been placed by one of the parties on the committee of vigilance in his ward, comes out in the papers, refusing the appointment, and stating that he had abstained from exercising the right of suffrage for twenty-five years! He ought to live in Constantinople.

The Editor of the St. Louis Republican, says it is very evident that a "searching operation" is going on somewhere in the Post Office Department, for he had just received several papers dated in December, 1833—only 10 months old!

Portrait of a Kentuckian.

On board of a North River Steamboat, Mr. Willis met, or tells us he met, a Kentuckian, who drawing liberally upon his imagination, for his facts, he describes after this fashion: "In a flat like the end of the club of Hercules, was crushed a pair of French kid gloves, which, if they fulfilled a glove's destiny, would flatter the rich man that the Camel might yet give him the required precedent. His hat had still the traces of being astonished with curling wings, and across his Atlantic breast was looped in a complicated zigzag, a chain that must have cost him a wilderness of racoon skins. His coat was evidently the production of a Mississippi tailor, though of the finest English material; his shirt bosom was ruffled like

a black silk cravat, tied in a curve—like a sort of a knot, hung out its limbs like the arms of an Italian improvisatore. With all this he was a man to look upon with respect. His under jaw was set up to its fellow with an habitual determination which would throw a highway tree into a shiver; but frank good nature, and the absolute freedom from suspicion lay at large in his Ajaean features, mixed with an earnestness that commended itself at once to your liking."

Perseverance.—When Dr. FRANKLIN walked into Philadelphia with a roll of bread in his hand, and told the tale of a contrast his after life would exhibit. And yet by perseverance and industry he placed himself at the table of Princes and became a chief pillar in the councils of his country. The simple journeyman, eating his roll in the street, lived to become a Philosopher and a Statesman, and to command the respect of his country and of mankind. What a lesson for youth!

A Significant Reply.—Thomas, said a sponging friend of the family to the footman, who had been lingering about half an hour to show him to the door. "Thomas, my good fellow, it's getting late, isn't it? How soon will the dinner come up, Thomas?" "The very moment you be gone, sir," was the unequivocal reply.

Precious Morceau.—The following is a literal copy of a notice circulated in Virginia, by a physician, who wished to offer his services to the public in a general way:

Doctor —, does concentrate his willing zeal in a train of physical applicability, and so with ecstatic impulse, he gives his compliments to the public, when informing the patronage of this vicinity, his intention of punctilio from an ample skill to all calls. He will announce his ideology on Physic, and so let plastic complimentary zeal to the public and this vicinity, be concordant with a fond wish from deemed ample professional punctilio to all calls.

NO IMPOSITION!

J. WELLER'S VEGETABLE

Rheumatic Compound, and INDIAN PANACEA.

THOSE who are afflicted with the Rheumatism, Colds, Coughs, or Consumption, will find a complete antidote by using the subscriber's incomparable medicine. A test of a number of years has satisfactorily proven the efficacy of this incomparable restorer of health, and has fully justified its introduction before an enlightened public—and does not hesitate to warrant it to answer all the purposes for which it is recommended. The great demand, and number of cures that have been effected by this Vegetable composition, and at the request of several respectable physicians, was the only inducement to bring it before the public. There are two distinct compositions, one for the Rheumatism, and one for Colds, Coughs, Consumption, and diseases generally of the Breast and Lungs. Annexed are names of a few persons that have been cured.

We the undersigned take great pleasure in announcing to the public that Mr. J. Weller's RHEUMATIC MEDICINE is a certain cure for it—and that we have been most violently afflicted with it, and were restored to health in a short time.

Nathan Epler, Jacob Coker,

Elizabeth Coons, T. Fringer,

H. Rosner, C. Newcomer.

Many more certificates might be obtained from the most respectable persons, but the above named can certify to its virtues—it is useless to say more about its virtues, as the most incredulous can satisfy themselves by a trial of it, and calling at Z. DANNER'S Drug Store, Gettysburg, who is sole Agent for the sale of it.

Pennsylvania College,

GETTYSBURG.

THIS institution was chartered by the Legislature of Pennsylvania, in 1832. It is situated in the borough of Gettysburg, Adams county, Pennsylvania. Gettysburg is 114 miles from Philadelphia, 52 from Baltimore, 50 from Lancaster, 36 from Harrisburg, and 32 from Fredericktown, Md. It is accessible by stages from the different places mentioned, and others either daily or several times a week.

The location of Gettysburg is not surpassed by any in the Union for health, and the town is remarkable for its morality.

Pennsylvania College has been continually increasing since its organization, and has numbered near 100 students. The present faculty are—

Rev. C. P. KRAUTH, President, and Professor of Intellectual and Moral Science; Rhetoric and Hebrew.

Rev. H. L. BAUGHMAN, A. M. Professor of the Greek Language and Literature.

Rev. M. JACOBS, A. M. Professor of Mathematics, Natural Philosophy and Chemistry.

Rev. J. H. MARSH, A. M. Professor of Mineralogy and Botany.

Mr. WILLIAM REYNOLDS, A. B. Professor of the Latin Language and Literature, and Principal of the Preparatory Department.

Mr. CHARLES SCHAEFFER, A. B. Teacher in the Preparatory Department.

The students, for the present, are boarded in private families in the town, under the supervision of the Faculty. The government of the institution is conformable as near as may be, to that of a well regulated family.

The winter session of the Preparatory Department commences on Thursday the 16th of October, and of the Collegiate, on Thursday the 30th of October.

There are two vacations in the year, in April and September; four weeks for the Preparatory, and six for the Collegiate Department.

\$14 for the winter, and \$10 for the summer session. Boarding can be had at from \$1.50 to \$2.00 per week.

YOUTH will parade on Saturday the 8th of November, at the house of Nicholas Moritz, in Liberty township, at 11 o'clock, A. M. with arms, and accoutrements in complete order.

By order, J. OYLER, O. S.

A Court of Appeal for the four last days, and said day, will be held at the above-mentioned place.

French Jujube Paste, or PECTORAL GUM.

THIS Medicine, besides its mild nature, possesses a pleasing taste, color and form. Its use is altogether convenient: between meals a small bit of it is kept in the mouth, and renewed when melted. The Jujube Paste has been used lately in Paris with the greatest success; it is softening, pectoral and calming; it effectually appeases a cough, and softens the pituitous humor in the throat and breast; it is chiefly beneficial to persons of dry constitution, with a tendency to phthisis, and to those who are liable to hoarseness and loss of voice.

Beware of Imposition!

RICHMOND, Va. July 15, 1830. The public will be pleased to understand that I was the original discoverer of Judkin's Ointment, and sole proprietor of the patent from Sept. 1817, until the expiration of the same; but, having connected myself with Dr. Judkins in the commencement, I permitted the Ointment to bear his name. The term of the patent having expired on the 26th June, I have made an improvement in the same, and taken out a patent thereon.

N. SHEPHERD, Of Imposition having been practised upon the public by a spurious article bearing the name of Judkins' Ointment, the proprietor avails himself of the authority granted to him in his letters patent, now to call the Ointment after his own name. Henceforth it will be known by the name of

SHEPHERD'S PATENT SPECIFIC OINTMENT, (formerly Judkins').

When I first made and prepared this Ointment, and had, in several instances, experienced its good effects, I sent it to several physicians, with instructions in what cases to apply it, who were of opinion that the Ointment would be a valuable public benefit. I concluded that the Ointment would occasionally fall into hands, some of whom would probably undertake to make it, and knowing the difficulty of the process—nevertheless, it might be propagated in this adulterated situation; as it might in some degree resemble the original—and in this way its good effects would be blighted. Under these considerations I secured the original and certain remedy for those obstinate diseases, some of which have so long baffled the skill of medical science.

1st. White swellings of every description.

2d. Sore legs and ulcers of long standing.

3d. Scirrhus or Glandular tumours, particularly those hardened tumours in women's breasts, which oftentimes terminate in ulcerated cancers.

4th. Felons, or what some people know by the name of Catarrhs, of every description.

5th. Rheumatic pains of the joints.

6th. Sprains and bruises of every description, or in whatever part situated.

7th. Tetter of all kinds. In this complaint the patient in applying the ointment must keep the part out of water.

8th. Chilblains, or parts affected by frost. It is also one of the best remedies for burns and scalds. It eases the pain and draws the fire out in a short time.

For women's inflamed breasts and glandular swellings, it is superior to any yet known to the medical faculty. It is much safer than mercurial applications, (as it does not contain the smallest atom of any preparation of the mineral) because it does not lay the patient liable to injury from the exposure to cold.

This ointment has cured sores of many years standing—where impossible or imprudent to heal the external sore, in consequence of the bones becoming carious or rotten, it will stop the progress of the caries, increase the quantity of discharge, remove the offensive smell and ease the pain.

It cures the worst Felons and Whitlows, on application of forty-eight hours.

The following notices on this may suffice:—

Before leaving Boonsboro, I had heard much of an article in which you appear before the public as proprietor, named Dr. William Judkin's Patent Specific Ointment, made by C. Herstons, near Frederick, Md. and of its decided efficacy in cures on persons with whom I am well acquainted. Since my residence in Baltimore it has performed a cure on a friend of mine afflicted with piles. Having myself been a sufferer for some years with this distressing disease, I now unhesitatingly applied your Ointment in my own case, and am gratified that I can say it made a perfect cure.
